

## rolling proof

### Multi-method pesticides covered by the module vegetables and fruits

|  |                                 |                              |
|--|---------------------------------|------------------------------|
| 2,4-D (free acid only)   | Buprofezin                      | Dichlorprop                  |
| 2,4-DB (free acid only)  | Cadusafos                       | Dichlorvos                   |
| 2,4-DDD  | Carbaryl                        | Dicloran                     |
| 2,4-DDE  | Carbendazim                     | Dicofol, 4,4`-               |
| 2,4-DDT  | Carbofuran                      | Dicrotophos                  |
| 4,4-DDD  | Carbophenothion                 | Dieldrin                     |
| 4,4-DDE  | Carbosulfan                     | Diethofencarb                |
| 4,4-DDT  | Chlorantraniliprole (Rynaxapyr) | Difenoconazole               |
| 3-Hydroxycarbofuran  | Chlordane cis                   | Diflubenzuron                |
| Abamectin (incl. Avermectin B1a, B1b and 8,9-Z-Avermectin B1a) | Chlordane trans                 | Dimethoate                   |
|  | Chlorfenapyr                    | Dimethomorph                 |
|  | Chlorfenson                     | Dimoxystrobin                |
| Acephate   | Chlorfenvinphos                 | Diniconazole                 |
| Acetamiprid  | Chloridazon                     | Diphenylamine                |
| Acibenzolar-S-methyl   | Chlorobenzilate                 | Disulfoton                   |
| Acrinathrin  | Chlorothalonil                  | Ditalimfos                   |
| Alachlor   | Chlorpropham                    | Diuron                       |
| Aldicarb   | Chlorpyrifos(-ethyl)            | DMST (Dimethylsulftoluidide) |
| Aldicarb sulfone   | Chlorpyrifos-methyl             | Dodine                       |
| Aldicarb sulfoxide   | Chlorthal-dimethyl              | Emamectin                    |
| Aldrin   | Chlozolate                      | Endosulfan-alpha             |
| Ametryn  | Clofentezine                    | Endosulfan-beta              |
| Atrazine   | Clomazone                       | Endosulfansulfate            |
| Azinphos-ethyl   | Clopyralid                      | Endrin                       |
| Azinphos-methyl  | Clothianidin                    | EPN                          |
| Azoxystrobin   | Coumaphos                       | Epoxiconazole                |
| Benalaxyl  | Cyazofamid                      | Ethiofencarb                 |
| Bendiocarb   | Cyfluthrin                      | Ethion                       |
| Benfluralin  | Cyhalothrin-lambda              | Ethirimol                    |
| Bentazone  | Cymoxanil                       | Ethofumesate                 |
| Benthiavalicarb-isopropyl                                      | Cypermethrin-alpha              | Ethoprophos                  |
| Bifenazate   | Cyproconazole                   | Etofenprox                   |
| Bifenox  | Cyprodinil                      | Etoxazole                    |
| Bifenthrin   | Deltamethrin                    | Etridiazole                  |
| Biphenyl   | Demeton-S-methyl                | Etrimfos                     |
| Bitertanol   | Demeton-S-methyl sulfone        | Famoxadone                   |
| Boscalid   | Demeton-S-methyl sulfoxide      | Fenamidone                   |
| Bromacil   | DEET (Diethyltoluamide)         | Fenamiphos                   |
| Bromophos (-methyl)  | Diafenthiuron                   | Fenamiphos-sulfone           |
| Bromophos-ethyl  | Diazinon                        | Fenarimol                    |
| Bromopropylate   | Dichlobenil                     | Fenazaquin                   |
| Bromuconazole  | Dichlofenthion                  | Fenbuconazole                |
| Bupirimate   | Dichlofluand                    | Fenchlorphos                 |

|                            |                           |                      |
|----------------------------|---------------------------|----------------------|
| Fenhexamid                 | Isofenphos-methyl         | Nuarimol             |
| Fenitrothion               | Isoprocarb                | Omethoate            |
| Fenoxycarb                 | Isoproturon               | Oryzalin             |
| Fenpropathrin              | Isoxaben                  | Oxadixyl             |
| Fenpropidin                | Kresoxim-methyl           | Oxamyl               |
| Fenpropimorph              | Lenacil                   | Oxyfluorfen          |
| Fenpyroximate              | Lindane (gamma-HCH)       | Paclobutrazol        |
| Fenson                     | Linuron                   | Paraoxon-ethyl       |
| Fenthion                   | Lufenuron                 | Paraoxon-methyl      |
| Fenthion-sulfone           | Malaoxon                  | Parathion            |
| Fenvalerate/Esfenvalerate  | Malathion                 | Parathion-methyl     |
| Fipronil                   | Mandipropamid             | Penconazole          |
| Fonicamid                  | MCPA (free acid only)     | Pencycuron           |
| Fluazifop (free acid only) | MCPB (free acid only)     | Pendimethalin        |
| Fluazifop-P-butyl          | Mecarbam                  | Pentachloroaniline   |
| Fluazinam                  | Mecoprop (free acid only) | Pentachloroanisole   |
| Flucythrinate              | Mepanipyrim               | Permethrin           |
| Fludioxonil                | Mepronil                  | Phenmedipham         |
| Flufenacet                 | Metaflumizone             | Phenthoate           |
| Flufenoxuron               | Metalaxyl                 | Phenylphenol-2       |
| Fluopicolide               | Metamitron                | Phorate              |
| Fluquinconazole            | Metazachlor               | Phosalone            |
| Flusilazole                | Metconazole               | Phosmet              |
| Flutriafol                 | Methabenzthiazuron        | Phosphamidon         |
| Fluvalinate-tau            | Methacrifos               | Phoxim               |
| Fonofos                    | Methamidophos             | Picoxystrobin        |
| Formetanate                | Methidathion              | Piperonyl butoxide   |
| Fosthiazate                | Methiocarb                | Pirimicarb           |
| Fuberidazole               | Methiocarb sulfone        | Pirimicarb-desmethyl |
| Haloxyfop (free acid only) | Methiocarb sulfoxide      | Pirimiphos-ethyl     |
| HCB (Hexachlorobenzene)    | Methomyl                  | Pirimiphos-methyl    |
| HCH-alpha                  | Methoxychlor              | Prochloraz           |
| HCH-beta                   | Methoxyfenozide           | Procymidone          |
| Heptachlor                 | Metobromuron              | Profenofos           |
| Heptachlorepoxyd-cis       | Metolachlor               | Profluralin          |
| Heptachlorepoxyd-trans     | Metoxuron                 | Promecarb            |
| Heptenophos                | Metrafenone               | Prometryn            |
| Hexaconazole               | Metribuzin                | Propachlor           |
| Hexaflumuron               | Mevinphos                 | Propamocarb          |
| Hexythiazox                | Mirex                     | Propanil             |
| Imazalil                   | Molinate                  | Propargite           |
| Imidacloprid               | Monocrotophos             | Propiconazole        |
| Indoxacarb                 | Monolinuron               | Propoxur             |
| Ioxynil                    | Myclobutanil              | Propyzamide          |
| Iprodione                  | Nitenpyram                | Proquinazid          |
| Iprovalicarb               | Nitrothal-isopropyl       | Prosulfocarb         |
| Isofenphos                 | Novaluron                 | Prothiofos           |

|                  |                                 |                    |
|------------------|---------------------------------|--------------------|
| Pyraclostrobin   | Sulfotep                        | Thiamethoxam       |
| Pyrazophos       | Tebuconazole                    | Thiodicarb         |
| Pyrethrins       | Tebufenozide                    | Thiophanate-methyl |
| Pyridaben        | Tebufenpyrad                    | Tolclofos-methyl   |
| Pyridaphenthion  | Tecnazene                       | Tolyfluanid        |
| Pyridate         | Teflubenzuron                   | Tri-allate         |
| Pyrifenox        | Tefluthrin                      | Triadimefon        |
| Pyrimethanil     | Tepraloxydim                    | Triadimenol        |
| Pyriproxyfen     | Terbacil                        | Triazophos         |
| Quinalphos       | Terbufos                        | Trichlorfon        |
| Quinmerac        | Terbuthylazine                  | Triclopyr          |
| Quinoxifen       | Terbutryn                       | Trifloxystrobin    |
| Quintozene       | Tetrachlorvinphos               | Triflumizole       |
| Quizalofop-ethyl | Tetraconazole                   | Triflumuron        |
| Rotenone         | Tetradifon                      | Trifluralin        |
| Spinosad         | Tetramethrin                    | Triforine          |
| Spirodiclofen    | TFNA (Metabolite of Flonicamid) | Triticonazole      |
| Spiromesifen     | TFNG (Metabolite of Flonicamid) | Vamidotion         |
| Spirotetramat    | Thiabendazole                   | Vinclozolin        |
| Spiroxamine      | Thiacloprid                     | Zoxamide           |
